

LATIN QUIZZES

All Latin quizzes will occur on Monday (“A” day).

Each weekly agenda will contain the Latin roots or words for the following week.

During the week before the quiz, each student must for Latin roots:

1. Memorize the definition of the root.
2. Use a resource to find a compound word using the root **in the correct context**.
3. Define the word the student has found.

All three of these points must be completed on the quiz in order to be correct for 1-point credit.

Example:

Root = **bio** - life

Sample word = **biology**

Definition = the study of life

Some Latin quizzes will be over the compound words only. On these quizzes, you need only define the term.
